- Sony Exmor CMOS image sensor
- Texas Instruments DSP
- Recording indicator
- Student privacy protect
- Sharp characters on boards
- Embedded watermark
- Innovative iFollow technology

Full HD

iCam is the Full HD camera which is designed for lecture recording. With Full HD 1080p, the video quality is 24 times than the traditional camera.

Watermark

iCam embed the watermark, you don't need to use the software to edit. And this won't affect the recording quality. With this useful design, your copyright can be protected!

Enhance Character

In order to enhance the characters on the whiteboards, digital boards, and projectors, iCam can detect the external environment automatically and make the characters clearer.

Privacy Protection

When recording the video, the students on the front rows might be filmed. To protect the students' privacy, iCam can screen this area, and make it invisible. You won't see the students when viewing the videos.

Indicator

To make sure the recording is processing, the LED indicator can help the teachers to monitor the recording status. With this useful design, you won't miss any excellent classes.
